Research Activity

Actively studying the relationship between cesarean surgical techniques and long-term severe adverse outcomes on women's health. 2019-2020, I published three articles on the subject and I am working on a book chapter on C-section. Currently, I am working on 3 active IRB approved protocols with Ob/Gyn residents and other faculty members and am preparing other protocols. I am actively researching about prevention of C-section related conditions such as Placenta Accreta Spectrum, Cesarean Scar Pregnancy, Uterine Rupture and other negative outcomes of C-section in the non-pregnant state.

Clinical Activity

I am the co-chair of the Pan American Society for Placenta Accreta Spectrum (PAS2), working to add prevention along the management of abnormal implantation. I am connected to various women's groups, such as the National Accreta Foundation, about C-section experience and promoting the safety of cesareans.

Education Activity

After 40 years, I remain passionate about teaching medical students, residents and fellow attendings the importance and impact of surgical skills and compassionate care on maternal outcomes.

Teaching Activities

- 1979–Present Teaching of residents in a clinical and academic setting, NYU Medical Center, New York, NY
- 1979–Present Teaching of 2nd and 3rd year medical students in a clinical and academic setting, NYU School of Medicine, New York, NY
- 1982–1986 Course Director, Outpatient Management of High Risk Pregnancy, Department of Obstetrics and Gynecology, NYU School of Medicine, New York, NY
- 1995–2005 Preceptorship of 1st year medical students, “The Skills and Science of Doctoring,” NYU School of Medicine, New York, NY
- 2000–2011 Preceptorship for High School Fellows Summer Program, NYU School of Medicine, New York, NY
- 2005–2011 Preceptorship of 1st year medical students, “Physician, Patient and Society,” NYU School of Medicine, New York, NY
